### **DETAILED ACTION**

This communication is responsive to the RESPONSE TO ELECTION REQUIREMENT filed March 26, 2007.

#### ***Election/Restrictions***

Applicant's election with traverse of Fig. 3 in the reply filed on April 26, 2007 is acknowledged. The arguments regarding the correspondence between the transmission is not found persuasive. Therefore, the requirement is hereby withdrawn.

#### ***Claim Objections***

Claims 1, 6, 9, 12 and 28 are objected to because of the following informalities: On line 1 of claims 6 and 12 "an" should be --a--. Also, concerning claims 1, 9, and 28, the use of bullets/letter throughout the claims is discouraged as it obscures the beginning and ending of the claims. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3681

It is unclear if the enclosure recited in claim 4 is the same as that recited on the first claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

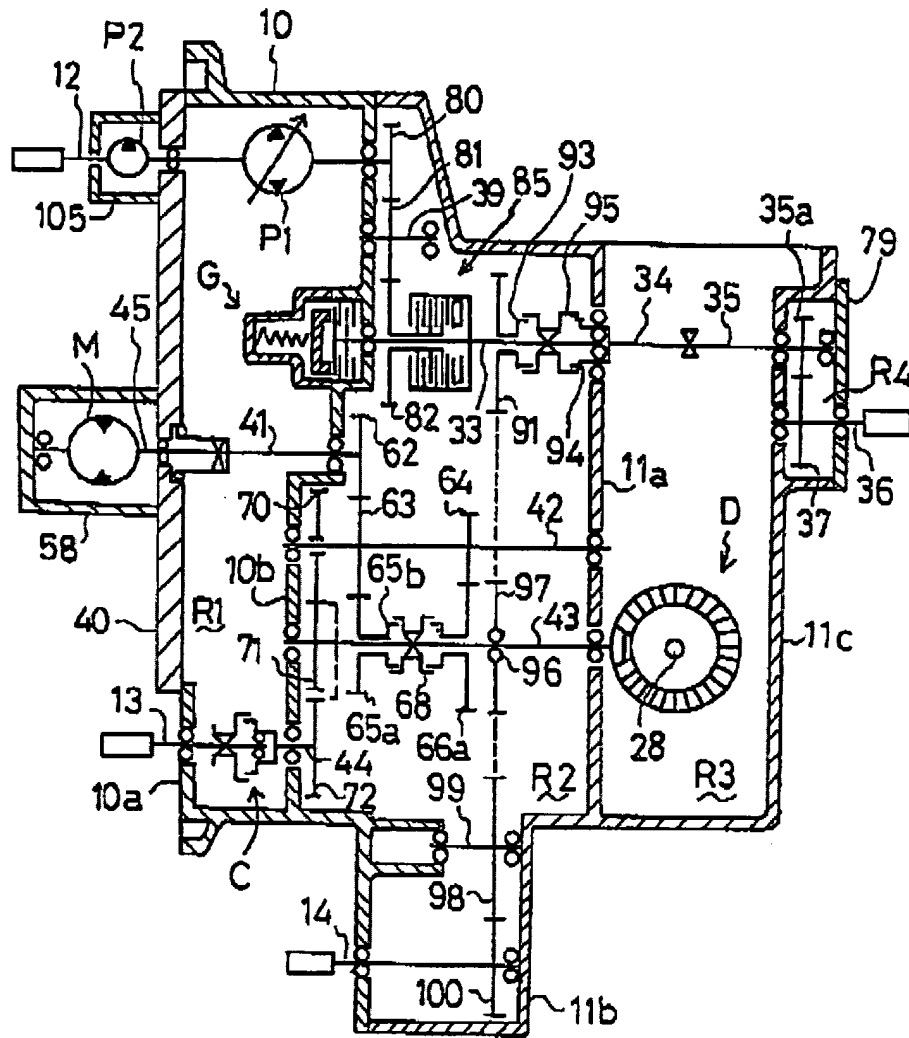

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsufuji ('587).

Matsufuji discloses a drive line system comprising a power input shaft (12), a power output shaft (36), an agricultural machinery (Fig. 1), a gearbox and clutch system (Fig. 2), a gear mechanism (80, 81, 82), a clutch mechanism (85), an enclosure (10), a lubricant (oil), a gear input shaft (39), a gear output shaft (82), a clutch output shaft (33C), a drive plate (84), a pressure plate (86), a biasing element (89), separate compartments (e.g., clutch piston chamber), and a right angle gearbox (28).
